

Features & Benefits

Easy mounting using knockout at end of fluorescent high bay luminaire	Hardware choices for adjustability or static mount
Multi-cell, multi-tier Fresnel lenses	Durable materials for optimal performance in challenging indoor high bay settings
Asymmetric and 360° coverage lens choices	Zero crossing circuitry reduces stress on relay and extends sensor life
LED indicator of occupancy detection for easy verification of coverage	Detection signature analysis eliminates false triggers
ASIC technology reduces components and enhances reliability	Recyclable
Easy front access to DIP switches for time and sensitivity adjustments	

Specifications

General Info

Product Line	Pass & Seymour	Country Of Origin	China
