

Infinium Uniboot cords utilize reconfigurable LC Uniboot connectors, combining the convenience of a single connector shell with the ability to change polarity in the field.

The uniboot utilizes a single cable containing both fibers, reducing the overall number of fiber cables and cable density. Ideal for high-density fiber patching in data centers.

Infinium Ultra Uniboot Fiber Patch Cords are built to exceed industry standards for quality, performance, insertion and return loss.

Features & Benefits

Improved Density: The MDCs connector design has a dramatically times greater density than LC. Reduces the overall number of fiber cables and cable density.

Quick Polarity Swap: Simply pull the boot away from the connector into place. No tools or exposed fibers, just quick and easy polarity swaps

Simple installation/removal: The push-pull release boot offers 1.5 inches reduced ferrule pitch from duplex LC connectors, allowing for up to 3 of finger space for easy removal, cutting removal times by 60%. The single connector with duplex ferrules simplifies installation, reducing insertion times by over 40%.

Compatible with Infinium acclAIM: MDC Patch Cords work with this down the cord jacketing, rotate the boot 180 degrees and slide it back leading pre-terminated fiber solution, allowing Direct Mating Breakout and eliminating pin or polarity issues, while offering the lowest optical loss from pre-terminated fibers.

Specifications

General Info			
Product Line	Ortronics	Color	Aqua
Country Of Origin	United States	Туре	Fiber Patch Cord
Dimensions			
Product Length US	10.0 m		
Technical Information			
Fiber Optic Cable Type	OM4	Jacket Application	Plenum Rated
Simplex/Duplex	Duplex	Cable Type	Fiber Optic
Jacket Rating	FT6 Rated, OFNP Rated	Boot Color	Aqua/White
Performance Level/Tier	Infinium Ultra
