

Commercial Light Shelves offer advanced daylighting control to bring more daylight into building spaces. Glare is managed by redirecting sunlight onto the ceiling so less artificial light is required. Combined with roller shades, your shading system can maximize daylight, save energy, and reduce artificial lighting needs.

Features & Benefits

Light Shelves offer advanced daylighting control to bring more daylight into building spaces. Use the Light Shelf system to reflect light further into the space than a window can provide without a shelf.

Combining roller shade and light shelves is the most complete daylighting solution for commercial spaces.
