

Wattstopper
DLM Wireless Open Loop Photosensor, Single or Multi-Zone
Part No. LMDL-600

The LMDL-600 is a wireless open loop photo sensor that measures the daylight contribution in order to automatically switch or dim multiple zones of lighting. It is part of the NEW wireless Digital Lighting Management (DLM) system and sends light level signals to control loads connected to DLM on/off or dimming room controllers.

Features & Benefits

Daylight responsive on/off and dimming control for up to three lighting zones

Dual IPv6 Mesh and Bluetooth® low energy antennas provide robust signal strength and reliable communication

60 degree spatial response for optimal detection of ambient light level

Uses IPV6 Mesh to establish network communication with all DLM wireless devices

Quick and easy wireless installation – no Cat 5e connection needed

Up to 10-year battery life; battery level can be viewed with wireless DLM software

Calibration using DLM Configuration App
