

The LMIO-301 photocell input module is an accessory for a networked Digital Lighting Management (DLM) installation that allows an LMSM segment manager or LMCP panel to read ambient light levels for use in controlling exterior lighting or interior lighting installed in brightly daylit spaces such as atriums. The LMIO-301 works in conjunction with either the LMPO-200 exterior or LMPS-6000 skylight low voltage photocell heads.

Features & Benefits

Retrieving data. Wait a few seconds and try to cut or copy again.

Works with LMSM segment manager or LMCP panel

Connects to segment network via DLM local network connection

Compatible with LMCP panels and LMSM segment managers

DIN rail clamp allows mounting in LMCP Series panel

Works with a choice of photocells for exterior and skylight locations
