

Wattstopper
DLM AX3.8 JACE 8000, Max 300 Rooms
Part No. LMJA-8300-AX

The LMJA-8xxx-AX (using AX 3.8) is a network controller designed to communicate with wired and wireless DLM network Bridges, for local in-room wired networks and/or LMCP panels. It provides control, monitoring, adjustment, and standard or Human Centric Lighting (HCL) scheduling functionality for networked DLM systems. The Network Supervisor is a PC server running similar software designed to coordinate control of multiple LMJA-8xxx's and store historical data.

Features & Benefits

Includes Wattstopper 1st year software maintenance agreement.

Allows remote changes to occupancy sensor and daylighting sensor settings in real time

Adjusts scheduling of normal and after hours

Create standard and HCL lighting schedules. Schedules may be repeating seven day, calendar event based or astronomic control

Allows real time current monitoring of rooms and groups when using load controllers with current monitoring circuitry (e.g. LMRC-2xx or LMPL-201)
