

The LMSH-CR Wireless Configuration Tool is a handheld tool for advanced remote configuration of Wattstopper Digital Lighting Management (DLM) Shade Systems. The tool enables system and device modifications via pushbutton, without ladders or tools, as well as easy configuration of settings for DLM shading local networks.

Features & Benefits

Remotely reconfigures and reports Shade parameters such as upper and lower limit, speed, and direction

Adjusts shade level to facilitate scene setting

Micro-USB port provided for firmware updates, allowing easy updates for support of new DLM products

Remotely reconfigures and reports switch and Pull preset settings

Remotely configures shade groups and scenes that can be used with Astronomic schedules.

The product meets the materials restrictions of RoHS

Specifications

General Info

Color	Black	Product Line	Wattstopper
Application Sector	Commercial		

Dimensions

Product Width US	2.5 in	Product Length US	4.2 in
Product Depth US	0.7 in		

Additional Information

RoHS Conformant	Yes	Product Has Potential to Contribute to LEED	Yes
