

Wattstopper
DLM Wall Switch, 2-Button w/IR, Red
Part No. LMSW-102-R

LMSW-100 Series Wall Switches are low voltage devices for energy-saving manual on/off control of one or more loads from one or more locations. They are part of a Digital Lighting Management (DLM) system and can control any load(s) connected to DLM room controllers.

Features & Benefits

Hidden configuration button for easy access to Push n' Learn

Infrared (IR) transceiver for wireless configuration and control

Each button can control individual or multiple loads, or one scene; LED indicates status

Six color options and custom engraving options; standard buttons may be replaced in the field

Digital Lighting Management components plug together on a free-topology Category 5e DLM local network

Sleek single gang devices fit decorator wall plates; 1-, 2-, 3-, 4-, and 8-button models

Switches may be used for multi-way control
