

## Wattstopper Touchscreen Injector

Part No. LMTI-100-120

Wattstopper's DLM Touchscreen Injector (LMTI-100-xxx) is a power source for up to two DLM system touchscreens (LMEQ41). It provides ultimate flexibility to the area by converting the communication protocol of the space's in-room bus (IRB) and supplies Power over Ethernet using either a 120VAC or 277VAC feed. Without the need for a separate controller or complex programming, the LMTI-100, combined with the LMEQ-41, provides the end-user with an elegant way to control the lighting system in the space. The LMTI-100 is ideal for DLM offices, education, and healthcare spaces where layered, dimmable, and tunable white lighting is desired through LMEQ-41 touchscreen control.

### Features & Benefits

Provides PoE power and communication to power one or two touchscreens without the need for a separate controller or complex programming

Options for 120VAC or 277VAC applications

Plenum-rated enclosure

Converts the communication protocol of the IRB to Po

No configuration needed

Hinged mounting plate for quick and easy installation

### Specifications

#### General Info

Product Line	Wattstopper	Color	Powder White
UPC Number	754182941735	Country Of Origin	China
