

Vantage Low Voltage Relay Module (DIN) Part No. LVRS8-DIN

The Vantage DIN Low Voltage Relay Station is a powerful control point for systems or devices that operate through low voltage relay control. A DIN LVRS includes eight SPDT relays to control devices such as draperies, pumps, garage doors, lifts, screens, pool covers, sprinklers, baths, security systems and more. Each relay corresponds to an individual button on the front of the unit, which allows the connected device to be manually switched. The individual relays “latch” to retain the last state in the event of a power interrupt.

Features & Benefits

Provides a single integration point for up to eight relay channels

Allows effortless control of devices such as draperies, pumps, garage doors, lifts, screens, pool covers, sprinklers, security systems, and much more

Clips easily on standard 35mm DIN rails
