

Wattstopper Low Voltage Switch, 2-Button w/LED, Black Part No. LVSW-102-B

LVSW-100 Series Low Voltage Switches are lighting control devices that use conventional point-to-point low voltage wiring for control of single or multiple loads. Each button provides a momentary contact that is intended for use with compatible low voltage relay panels or similar lighting control panels or devices. Each button has an LED indicator that can serve as a status indicator or as a locator light.

Features & Benefits

| | |
|---|--|
| Low voltage pushbutton switches for on/off control of one or more loads | Compatible with LC8, LP8, LI and LMCP Series lighting control panels |
| LED pilot light on each button | Customizable, field replaceable buttons |
| Single gang devices, compatible with standard decorator style face plates | Appearance matches DLM LMSW-100 Series digital wall switches |
