

The Legrand POL splitters are point to multipoint cassettes designed to split SC connectors over a Passive Optical LAN (POL) that provides the capability to securely deliver voice, data and IP/broadband video. A POL is an alternative to a traditional Ethernet LAN and is widely accepted as an ideal replacement of old copper networks. A POL allows you to optimize your resources with a simple, space saving installation and provides benefits such as cost reductions, greater efficiencies, scalability and a clear upgrade path.

## Specifications

---

### General Info

---

Product Line	Ortronics	UPC Number	662875924449
Country Of Origin	Taiwan, Province Of China	Application Sector	Commercial
Standard	TIA-568-C.3	Type	Cassette

---

### Additional Information

---

RoHS Conformant	Yes
