The wire frame and rack unit finger design promotes efficient routing of patch cords between racks. Dual hinged snap-on covers allow easy access during moves, adds and changes. A 6″ wide cage is supplied with four cable management spools and 12 bend-limiting clips.

Features & Benefits

Vertical cage with individual rack unit fingers: Provides organized method for routing and storage of patch or cross connect cable between racks.

Mounted on the front flange between the Mighty Mo 6 racks when two or more are installed in a row, on a single rack or the end of a row: 6″″ and 10″″ widths create a channel between racks for front to back routing of equipment cables and patch cords.

All necessary mounting hardware included: Hanger clips hold the cage in place for easy and quick one person installation.

Dual snap on hinged covers: The door allows easy access during moves, adds and changes.

6″″ and wider are supplied with four slack storage spools and 12 bend limiting clips: Improved bend limiting control for copper and fiber cords.
