

radiant Collection  
Netatmo Smart Wind Gauge  
Part No. NWA01WW

Monitor the wind with your Weather Station.

The perfect addition to your Weather Station, the Netatmo Smart Anemometer sends wind data directly to your smartphone. Using the latest in ultrasound technology, it reliably measures wind speed and direction in real time. View your data history to track the wind and learn about wind activity around your home while you're away. Do you live in a region prone to storms? Would you like to keep an eye on your garden? Or maybe you're just curious about changes in the wind? Customize your alerts to receive real-time information when the wind gets stronger or reaches a certain speed. With the Smart Anemometer, make your life easier by letting your Netatmo Weather Station master the wind!

### Features & Benefits

View wind speed and direction in real time, via your smartphone.

Receive an alert on your smartphone as the wind picks up.

Easily plan activities with convenient, real-time wind speed and direction information, and even track wind data over time.

Your life is made easier taking into account changes in the wind.

Easily install it outdoors, up to 100 meters from your Weather Station's indoor module.

### Specifications

#### General Info

Color	Black	UPC Number	700730500220
Country Of Origin	China	Product Line	Pass & Seymour
Finish	Glossy	Application Sector	Residential/Commercial
Type	Accessory	Standard	FCC and CE

#### Additional Information

RoHS Conformant	Yes
