

Cablofil Discontinued - Cablofil Cable Cleats Part No. P280013

Cablofil cable cleats are designed to restrain cables from lateral and torsional forces supported by ladder tray. In vertical applications, cable cleats provide axial strain relief to cables without damaging the cable sheath. Cablofil heavy-duty cable cleats enclose the cable and the ladder rung with a rigid hi-strength interlocking frame that protects high, medium and low voltage cables from mechanical damage resulting from short circuits.

Features & Benefits

Suitable for continued use after exposure to short circuits

Protects against damage to cables and ladder tray

Nonmetallic material, helps limit hot spots at the location of the cleat due to circulating currents

Accommodates virtually every type of cable tray rung, including I-beam, elliptical, square and channel strut
