

The aluminum I-beam design of ITray is perfect for industrial installations with large diameter cables in long span situations, minimizing total tray width and creating a smooth transition between straight sections and fittings. A structural offset in the sidewall creates strong, mid-span splices that need fewer supports. Each splice snaps in place and stays without holding. Additionally, only four bolts are needed for each splice reducing hardware needs by 50%. These features allow Itray to be installed up to 30% faster than standard tray.

Features & Benefits

Bend plates to appropriate angle as needed

Torque: 19ft./lbs.

KIT INCLUDES ONE INSIDE AND OUTSIDE PLATE

Field drill outer plate if needed

MEETS CABLE TRAY BONDING REQUIREMENTS

Specifications

General Info

| | | | |
|--------------------|------------------------|-------------------|----------|
| Product Line | Cablofil | Finish | Aluminum |
| UPC Number | 800388200593 | Country Of Origin | Mexico |
| Application Sector | Commercial, Industrial | Type | Splicing |

Dimensions
