

"The aluminum I-beam design of ITray is perfect for industrial installations with large diameter cables in long span situations, minimizing total tray width and creating a smooth transition between straight sections and fittings. A structural offset in the sidewall creates strong, mid-span splices that need fewer supports. Each splice snaps in place and stays without holding. Additionally, only four bolts are needed for each splice reducing hardware needs by 50%. These features allow Itray to be installed up to 30% faster than standard tray."

Features & Benefits

Includes installation hardware

Specifications

General Info

Product Line	Cablofil	Finish	Stainless 316
--------------	----------	--------	---------------

Dimensions

Product Width US	0.875 in	Product Weight US	6.709 lb
Product Volume US	0.21 cu ft	Product Depth US	72.0 in
Product Height US	5.75 in
