Vantage
Wireless Dimmer Station
Part No. RadioLink-Wireless-Dimmer

The RadioLink® EasyTouch II ScenePoint dimmer is a wallbox dimmer with contemporary aesthetics and functionality that complements each project design. Available in one through five-button configurations, EasyTouch II's custom color palette allows designers to match or mix finishes for trims, buttons, and faceplates. Buttons feature full-range, RGB backlighting with a built-in diffuser. The backlight color indicates the status of the programmed button by providing the user with the option to personalize the color for on, off, or other status feedback. And, due to Vantage's use of laser engraving, only the lettering on each button will be illuminated, maintaining the aesthetic appeal of the dimmer.

Features & Benefits

Modular one to five button options

Custom color palette option to match or mix finishes for trims, buttons, and faceplates

Backlighting automatically adjusts based on time of day; easily see which scenes are active based on backlit button color or intensity

Specifications

General Info

Product Line	Vantage	Application Sector	Residential
Type	Accessory		

Dimensions

Product Width US	4.25 in	Product Weight US	0.5 lb
Product Height US	2.75 in	Product Length US	6.25 in

Additional Information

RoHS Conformant	Yes
