Furniture Feed Style Poke-Thru Devices are an excellent solution for feeding power and communication services to modular furniture systems in an open space, above grade floor environment. Every Wiremold Poke-Thru Device comes with built-in TopGuard protection, an industry-leading design that meets and exceeds UL scrub water exclusion requirements for tile and carpet floors. TopGuard protection prevents water, dirt, or debris from entering the power and communication compartments through the service head or floor fittings. All Wiremold Furniture Feed Style PokeThru Devices can be installed on tile, carpet, or wood covered floors and are an excellent solution for both new or retrofit construction. Typical applications include commercial office buildings, financial institutions, and government facilities.
