

With two programmable buttons, RadioLink keypads provide scene control for transition areas such as hallways or pathways that are traditionally wired with 3- or 4-way switches. In existing structures, RadioLink keypads quickly install in the place of standard switches without running new wires. In addition, RadioLink keypads will fit the needs of any new construction project, allowing for incremental expansion of a system to accommodate almost any design or budget.

## Features & Benefits

Full range, RGB, adjustable backlight for buttons

Hidden, ambient light sensor for automatic day/night backlight intensity control

Hidden, built-in IR receiver

## Specifications

### General Info

Product Line	Vantage	Color	White
Application Sector	Residential	Type	Accessory

### Dimensions

Product Width US	4.0 in	Product Weight US	0.53 lb
Product Height US	2.75 in	Product Length US	6.25 in

### Additional Information

RoHS Conformant	Yes
