

Vantage  
Standard Dimmer Module - 12 Load  
Part No. SDM12-EM

The Standard Dimmer Module (SDM12-EM) is a key component of Vantage's lighting control solution. The SDM12-EM is mounted in a Main or Secondary Power Enclosure (IMPE or ISPE) and supports control of up to 12 standard (forward phase) lighting loads with up to four line feeds and up to 64 total Amps per module. Each load output has a latching relay to ensure no Voltage leak when the dimmer is off and allows outputs to be used as relays. Module locking mechanisms for improved in-field plug and play installation and service allow modules to be quickly replaced without affecting load connections to the system. Layout of the Dimmer Module is simply designed through Vantage Design Center software.

## Features & Benefits

Supports control of up to 12 loads

Plug-and-play design

Eliminates the need for field wiring to the module

## Specifications

### General Info

Product Line	Vantage	UPC Number	804428050254
Country Of Origin	China	Application Sector	Residential
Type	Accessory		

### Dimensions

Product Width US	10.75 in	Product Weight US	6.6 lb
Product Height US	8.75 in	Product Length US	12.5 in

### Additional Information

RoHS Compliant	Yes
----------------	-----

### Technical Information

Seismic Tested	No
----------------	----
