

Vantage
Standard Load Dimmer Module (DIN)
Part No. SLDS4-DIN

The Standard Load dimmer Station is used to incrementally expand the control and dimming capacity of the Vantage automation and lighting control system. It is designed to easily install on standard 35 mm DIN rail and has connections to control up to four 480 wattloads at 240 VaC. The Dimmer Station can communicate with a Vantage master through a two-wire bus or a small connector on its side to orchestrate complex and elegant lighting scenes. Each load can also be independently controlled from the four buttons on the front of the housing.

Features & Benefits

Features six contact inputs for control of additional auxiliary devices

Dims incandescent, and magnetic loads

Displays the operating status with LED indicators

Specifications

General Info

Product Line	Vantage	Application Sector	Residential
Type	Accessory
