

Legrand
radiant® 15A Self-Grounding 4-Way Switch
Part No. TM874SBK

Granting control of a single light or fixture from three or more separate locations (working in conjunction with 3-Way Switches), this switch is also designed to automatically ground to the electrical box when installed. Ideal for homes in highly-populated cities or regions where structures may not already be grounded for electrical safety. Part of the radiant® Collection, it also features clean lines and smooth paddle action for a sophisticated touch. Made exclusively for use with screwless Wall Plates from the radiant® Collection, sold separately. Not sure if your home's electrical wiring is grounded? Your outlets might be a clue. If your home has outlets with only two slots for plug prongs, it is unlikely grounded. Tester devices are also available to confirm proper grounding, or you can always call your local electrician for an inspection.

Features & Benefits

Part of the all-new radiant: collection.

High-impact resistant thermoplastic construction.

Push wire #14 AWG.

Extra-long, through-body strap eliminates floating installations and imperfect applications.

Tri-drive ground, terminal and mounting screws.

For covering patents, see www.legrand.us/patents.

Smooth paddle action.

External screw-pressure-plate back and side wired. Accepts #12 and #14 AWG.

Narrow back body leaves more room for wires in the box.

Easy-access green hex head ground screw.

Automatic ground clip.
