POWER THE FUTURE OF FLEXIBLE SPACES

Flexible commercial spaces are essential.

From workspaces to libraries, space planning plays a significant role in employee and customer satisfaction. Legrand offers innovative and stylish solutions that provide power, data and charging connections exactly where they are needed. The flexibility of these products allows users to easily reconfigure layouts and meet the demand for increased technology in evolving spaces.

FLEX[®] RACEWAY SYSTEM

Floor-Based Power & Data Distribution Systems from Connectrac[®]

The Flex Raceway System is an innovative floor-based power and data distribution system for interior spaces. Flex is a prewired raceway that features expandable data capacity and interchangeable power devices that can be hot-swapped or completely removed at any time. With Flex, you can easily adapt power and data connectivity to suit the needs of any space.

Accessibility & Installation

The Flex Raceway is available in two installation options: under-carpet or on-top of any flooring surface.

Both are ADA compliant to maintain inclusive spaces.

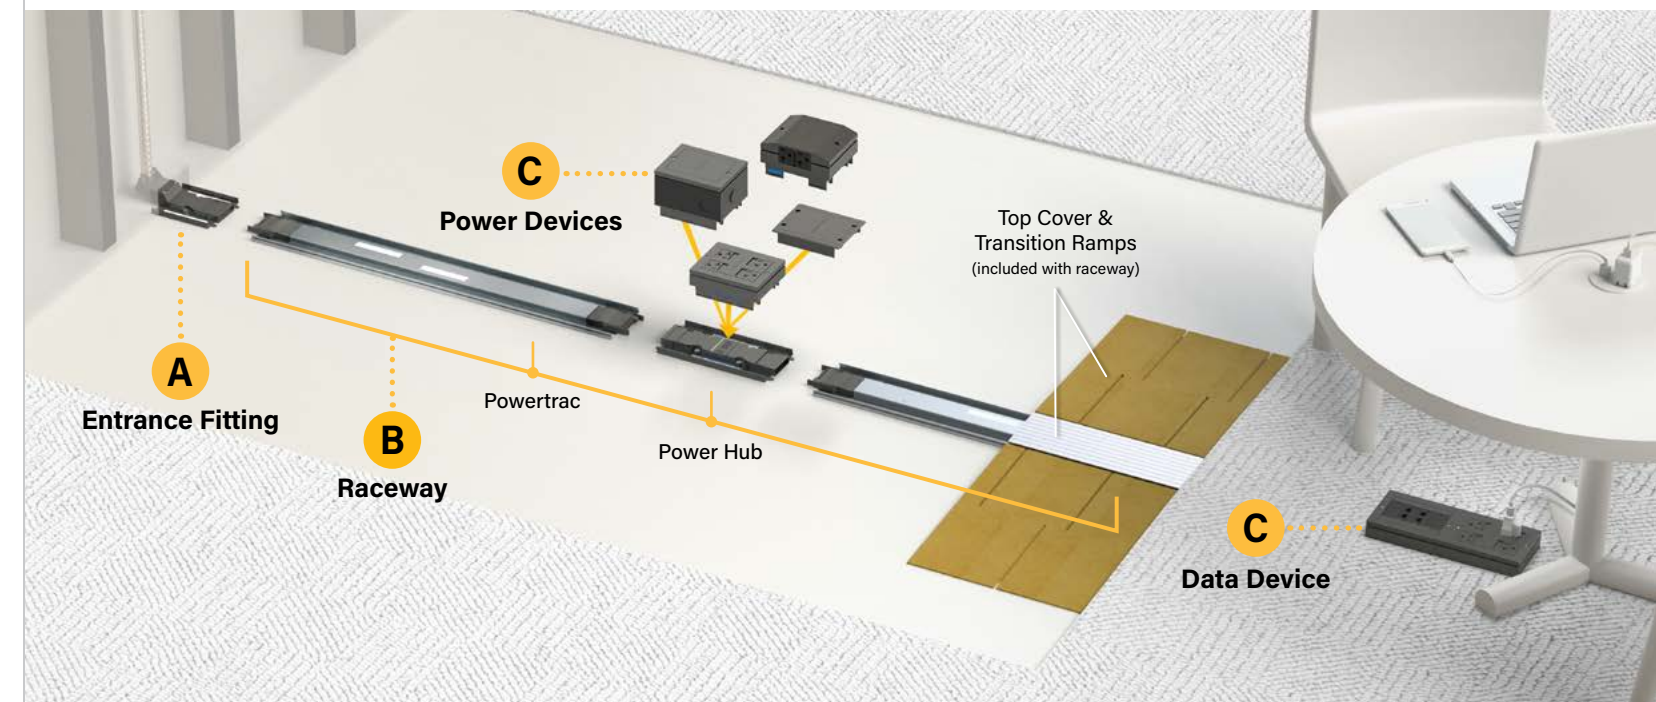

Interchangeable Power Devices

Flex features expandable data capacity and interchangeable power devices that can easily be hot-swapped or completely removed, allowing users to quickly reconfigure layouts. Tamper-resistant device options are available for enhanced safety.

Entrance Options

Wall: In- or On-Wall Entrance options, or transition from 2400[®] or 4000[®] Series raceway systems.

Open Space: 4" Poke-Thru Entrance supports power and data from open spaces.

EXPRESS KITS

Floor-Based Power & Data Distribution Systems from Connectrac

The Connectrac Express Kits are a grab-and-go raceway that conveniently manages and conceals power and data cables on the floor. Each kit contains everything needed for installation, including prewired power, versatile data and low-profile transition ramps.

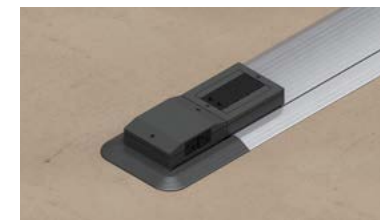

Express Kits are available in two installation options: under-carpet or on top of any flooring surface.

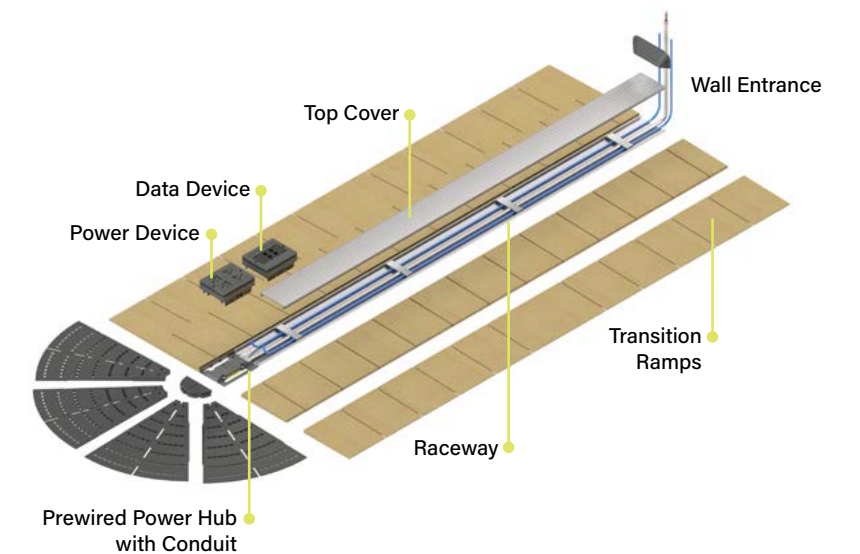

Complete Raceway Solution

The under-carpet system seamlessly conceals cords and cables under carpet tile. The on-floor system is a visible raceway that can be installed on top of any flooring surface.

Both systems are ADA compliant and are available in 6' lengths with 3' extensions available to reach desired length. It is recommended not to exceed 15', as the conduit is 25'.

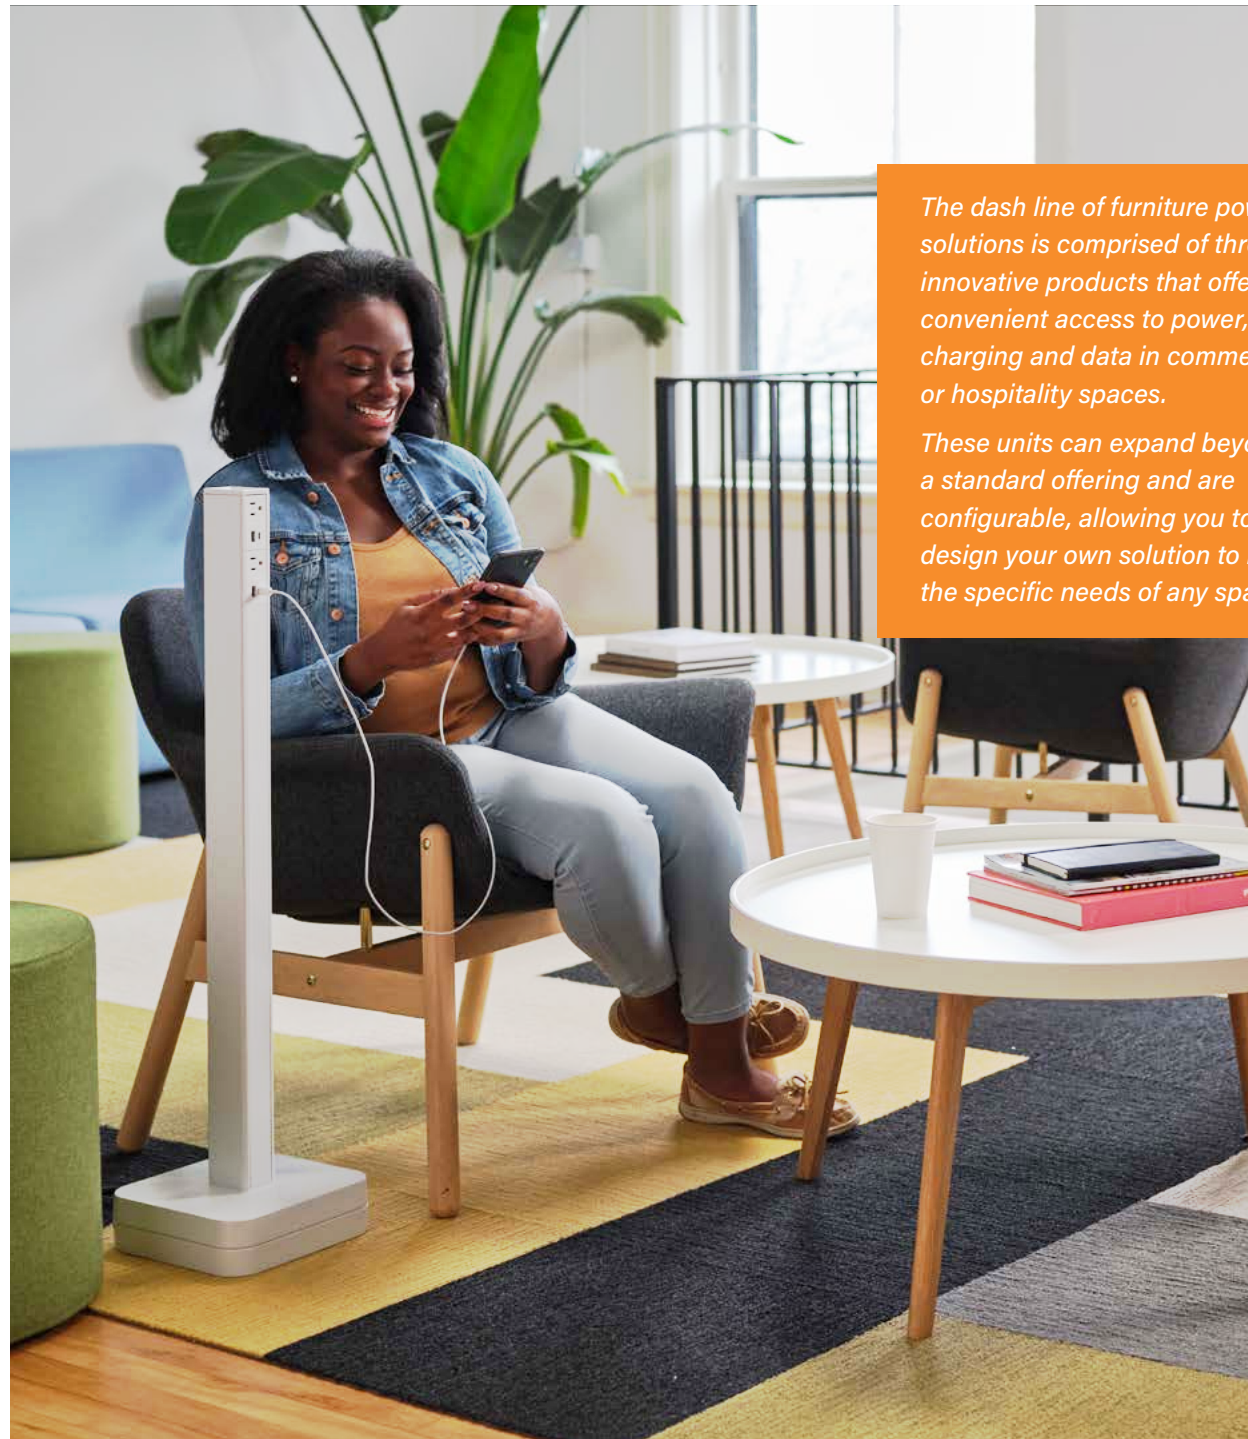

On-Floor Power Device includes 4 power outlets and up to 8 data keystone modules

dash™

Configurable Power Solutions

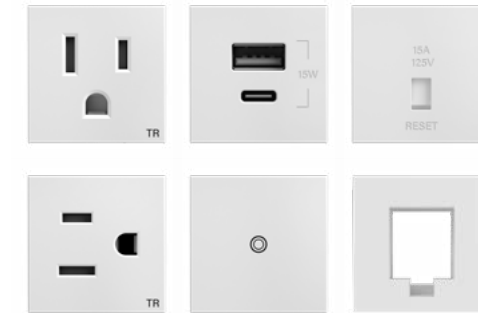

The dash line of furniture power solutions is comprised of three innovative products that offer convenient access to power, charging and data in commercial or hospitality spaces.

These units can expand beyond a standard offering and are configurable, allowing you to design your own solution to meet the specific needs of any space.

Highly Configurable

The dash family of products are available in a set of standard configurations that are ready-to-purchase or can be customized to match an interior's specific requirements. Design a set of cubes to match your needs, including power, charging, data and switching capabilities.

dash Furniture Power Center

Easily install into furniture, providing convenient access to power, data or control of nearby devices with the built-in switching controls.

- Available in two to six cube configurations
- Offered in either white or graphite finishes with matching trim plates
- Optional metallic finish trim plates available in stainless, bronze and brass
- Additional data connectivity available through Tracjack® or Keystone data frames
- Available with built-in switching controls for cord-connected loads

dash Power Tower

Provide greater flexibility to move power within a space in the form of an indoor charging station that allows for convenient access to power and charging that blends in with your space.

- Available in four to six cube configurations
- Features retractable power cord
- Offered in either white or graphite finishes
- Standard height of three feet, perfect for indoor huddle spaces

dash Desktop Power Center

Designed for installation on or under desks and tabletops. Ideal for providing users the perfect combination of power and charging at the work surface.

- Available in two to six cube configurations
- Can be clamp-mounted on edge of table or screwed in with right-angle bracket
- Offered in either white or graphite finishes
- Additional connectivity through the Keystone data frame

MODPOWER™ SYSTEM

Modular Power for Flexible Work Spaces

The ModPower System was the industry's first code-compliant modular power system. Connect up to six power units together to bring power and charging access right to the point of use. ModPower can be disconnected, moved around and reconnected using a set of interconnecting cords making it perfect for flexible spaces.

Interconnected Power Access

ModPower is available in two installation options:

- On-Surface: Can be mounted on or above table surfaces
- In-Surface: Includes a bezel that hides the mounting screws for a cleaner look

Each unit features:

- (3) tamper-resistant outlets
- (1) USB Type-A port
- (1) USB Type-C port

Modular system allows devices and furniture to be disconnected and rearranged.

CONVENIENT & FLEXIBLE POWER SOLUTIONS

Furniture Power Center

The Round Furniture Power Center adds power and charging connections directly to tables and upholstered furniture. This easy-to-install device has a flush design that seamlessly blends into furniture. Available in various outlet, USB and color options.

- Available in black, white or nickel finishes
- Multiple power and USB charging configurations available
- Spill-water-rated versions available for tabletop use

Desktop Power Center Slim

Bring power and charging connections up to a table or desk with the Desktop Power Center Slim. The minimalist design with black or white finish options effortlessly blend in with any space.

- 65W option for fast charging for laptops and mobile devices
- Sleek, space-saving design
- USB Type-C & USB Type-A
- Flexible mounting options for above and below work surface

Tele-Power® Poles

Provide outlets right where they're needed. Run power down from the ceiling with a neat and efficient Tele-Power Pole that integrates right into the space around it.

- Industry-standard steel and aluminum options
- Available in 10', 12' and 15' lengths
- Allows for in-field modifications, including device plates and height changes
- Custom poles available from 20' to 30' upon request

Plug-In Outlet Center & Under-Desk Basket Tray

The Plug-In Outlet Center offers easy-to-access power outlets and USB ports for convenient charging that keeps laptops and other electronics ready for work. Available with USB-C PD and USB-A with a total output of 20 watts, along with multiple other power options. Use with the Under-Desk Basket Tray to keep cables neatly organized and tucked out of the way.

CONNECTRAC FLEX + MODPOWER SYSTEM

Seamless Power Integration from Floor to Desk

Legrand's solutions don't just complement each other; they work well together. By combining two of our most adaptable solutions, changes in layouts can easily occur while maintaining power and data connectivity connections.

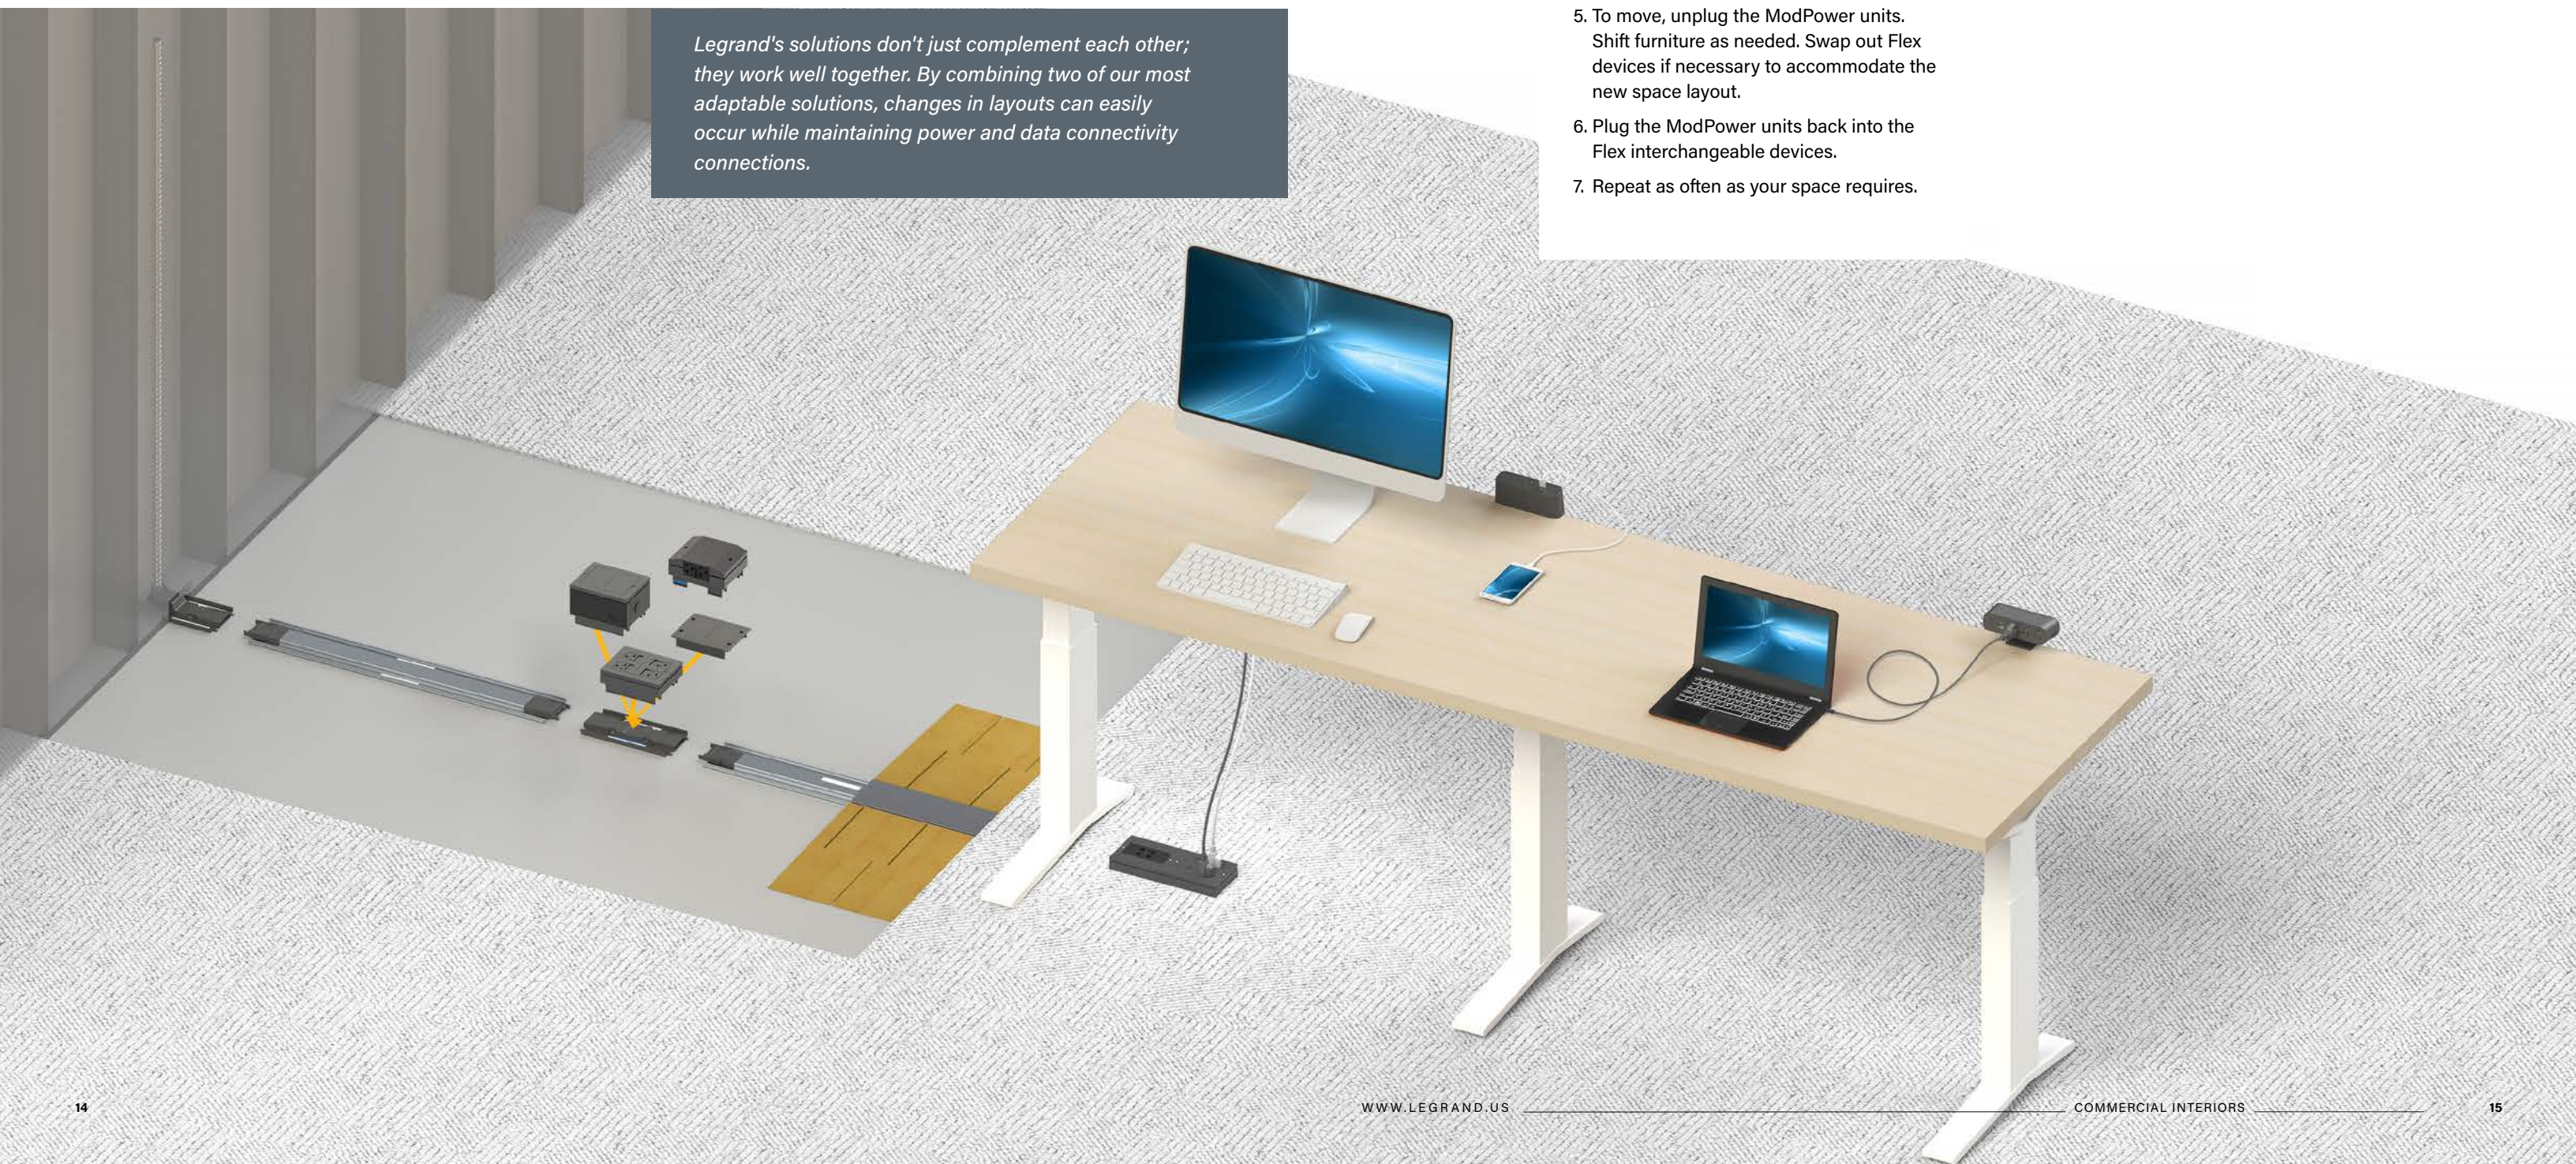

Connecting Flex Raceways and ModPower is Simple

1. Install Flex for under carpet tile or on top of any floor surface.
2. Install ModPower units as desired on top of desks or tables.
3. Set up Flex interchangeable devices however you need.
4. Simply plug the ModPower units into the Flex interchangeable devices.
5. To move, unplug the ModPower units. Shift furniture as needed. Swap out Flex devices if necessary to accommodate the new space layout.
6. Plug the ModPower units back into the Flex interchangeable devices.
7. Repeat as often as your space requires.

"A Powerful Pair" Video

The ModPower System can be unplugged and flow with changing furniture, while the Flex Raceway System can be customized quickly with easy snap-in interchangeable power devices.

Click on video to see the system in action or scan the QR code.
