50A Turnlok® Plugs and Connectors

Make Every Connection Count

When it comes to temporary power applications and tough deadlines, every connection must count. To power up and connect with confidence, you need plugs and connectors that are as tough as the environments you work in.

Our 50A Turnlok Plugs and Connectors make installing and securing your connections faster, safer and more dependable than ever. Designed to withstand harsh environments, these devices feature a revolutionary push, twist and lock design that makes installing and securing your connections fast and easy – saving you time and money.

Push, Twist & Lock Easy Body Assembly:

The back body easily slides onto the device and locks in place with a simple quarter twist. No time-consuming threading.

Adjustable Cord Clamp:

Located outside the back body for greater flexibility to accommodate a wider range of cord sizes 8AWG-4AWG. Clamp screws are on the same plane for faster installation. Longer screws are included to adjust for larger cables.

Same-Plane Hex Head Terminations:

Hex head termination design for faster, easier and safer terminations that allow more torque to be applied without the risk of harmful screwdriver slips. All termination screws on the same plane for a more accurate and streamlined installation that saves you precious time on the job.

Industrial-Strength Brass Alloy Plug Blades and Connector Contacts:

Resist heat rise and provide excellent conductivity.

Nylon 66 Shell Material:

Durable impact and corrosion-resistant material that ensures high performance even in the toughest environments.

External Cord Grips:

New design provides visible assurance of safe and proper cord retention.

Integral Flexible Rubber Cord Grommet:

Conforms to and seals around SO cord to provide ample protection from oils, water or chips entering the wiring chamber.
