

# SENSITIVE APPLIANCE GFCI WITH SAFELOCK® PROTECTION

## *Sensitive Protection for Sensitive Appliances*

Modern sensitive appliances increasingly include variable speed drives to reliably deliver energy-saving operations. At higher operating frequency levels, appliances can sometimes inadvertently leak more current to ground, leading to a greater incidence of disruptive GFCI nuisance tripping.

Legrand's Sensitive Appliance GFCIs with SafeLock Protection are targeted solutions designed to address common problems with sensitive appliances. These devices can significantly reduce the incidence of nuisance tripping for a more reliable, uninterrupted operation experience, saving installers time and money from unpaid callbacks.

### Reduced Incidence of Nuisance Tripping

Helps to maintain an uninterrupted supply of power to appliances, reducing the need for unpaid callbacks.

### Automatic Self-Testing

Conducts an automatic self-test every three seconds, ensuring the GFCI device is always ready to protect.

### Indicator Light

Flashes if the device fails the self-test, signaling that the GFCI should be replaced.

### Patented SafeLock Protection

If critical components are damaged and ground fault protection is lost, power to the receptacle is disconnected.

### Durable Construction

High-impact-resistant, thermoplastic construction for superior strength and durability.

### White Finish

Complements a variety of design aesthetics in commercial and residential applications.

## Which Sensitive Appliance GFCI is right for my application?

SINGLE GFCI	AUDIBLE GFCI
<ul style="list-style-type: none"> <li>Ensures a dedicated power source where GFCI protection is required.</li> <li>Applications include sump pumps, outlets serving pool motors, window A/C units and similar specialized sensitive equipment to minimize interference from other nearby loads.</li> <li>Support backup power requirements to ensure a limited generator or battery source is only accessed by designated loads.</li> </ul>	<ul style="list-style-type: none"> <li>Audible alarm alerts to a tripped GFCI condition and that power to the receptacle has been interrupted.</li> <li>Ideal for receptacles serving basement pump systems, commercial freezers, refrigerated display cases and other large appliances where GFCI indicator lights are not visible.</li> <li>Audible alarm can be switched on or off.</li> </ul>
