

# Always Ready to Protect

## Hospital Grade GFCI with Power Indication

The Hospital Grade GFCI with Power Indication provides a visual signal of power present at the receptacle. Designed with SafeLock™ Protection, this GFCI is ideal for emergency circuits or essential electrical systems applications in healthcare environments, the device conducts an automatic test every three seconds, ensuring it's always ready to protect and make each critical connection count.

designed to be better.®

## Features and Benefits:

- **Power Indication Light:** Green or amber LEDs clearly indicate presence of power at the GFCI receptacle. The smaller separate red indicator light flashes if the device fails the self-test, signaling the receptacle needs to be replaced.
- **Hospital Grade:** Subjected to additional rigorous performance requirements including reliability, integrity, strength and durability tests.
- **Tamper-Resistant:** Enhanced automatic shutter system allows for easier plug insertion while preventing the insertion of other objects.
- **Patented SafeLock Protection:** Power to the receptacle is disconnected if critical components are damaged and ground fault protection is lost.
- **High-Impact-Resistant Thermoplastic Construction:** For superior strength, durability and long-lasting, dependable performance.
