

SECURITY KIT FOR WIRE MESH TRAY

Easy Installation. Maximum Security.

**Wire Mesh Tray Sold Separately*

As an industry leader, Legrand offers a game-changing accessory for contractors working in high-security applications.

The first of its kind on the market, the Security Kit easily converts sections of existing wire mesh tray into a completely enclosed secured run. This single-supplier solution simplifies the installation process by eliminating both the need for combining different types of tray and the hassle of coordinating multiple suppliers.

FEATURES AND BENEFITS:

- **Single-Source Supplier:** Kit contains everything needed for installation including a solid steel cover, solid steel 3-sided insert and secure connectors that attach using tamper-proof screws.
- **Durable Finishes:** Available in pre-galvanized or black finishes that help extend the lifespan of the product.
- **3-Sided Steel Insert:** Lays inside the wire mesh tray and protects cables from the bottom and the sides.
- **Steel Cover:** Encloses the top of tray for enhanced security that prohibits unauthorized access.
- **Steel Connectors:** Include tamper-proof hardware that holds the fully secured system in place.
- **Versatile Compatibility:** Easily converts sections of existing wire mesh tray system into a completely enclosed, secured run.

APPLICATIONS

PRIMARY:

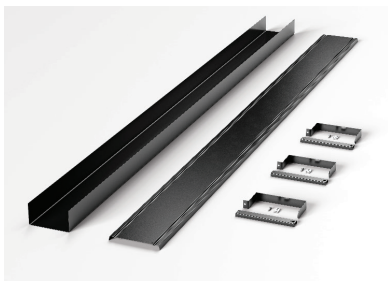

- Data Centers

Kit is designed for both colocation facilities and traditional data centers, focusing on unsecured areas such as hallways, conference rooms and offices.

ADDITIONAL ENVIRONMENTS:

- High-security areas
- Government buildings
- Financial institutions
- Lobbies
- Hospitals
- Correctional intuitions
- Any environment where additional security is needed or preferred
