

# SSU LITE

The System Support Unit, Lite (EN-SSU-LITE) is a local host of the Polaris software, giving Facility Managers and Building Operators a straightforward way to monitor and manage their Wattstopper PLUS network. With the SSU LITE, users can adjust lighting settings, update schedules, and modify system configurations—all from a single, reliable interface. Ideal for small and medium jobs, up to 2000 nodes.

INSTALLATION  
INSTRUCTIONS:

## FEATURES & BENEFITS:

- Provides seamless access for facility managers to monitor, analyze, and maintain the system
- Supporting Wired, Wireless and DALI systems
- Easy to install Wall Mount included
- Stores historical data relating to system performance like energy savings, occupancy usage
- Enables secure access to configure, analyze, and troubleshoot the Wattstopper PLUS System
- Manages 3rd Party integrations (e.g BACnet, OpenADR, AV integrations)
- Maintains system configuration for easy recall
