THE PATH TO A/V CONNECTIVITY

Audio/Video Device Plate

Video Device Plate

Audio Device Plate

Computer Device Plate

Data Device Pla**te**

Wiremold® AVIP Series Device Plates allow for A/V connectivity in the full range of Wiremold A/V compatible pathways. Each single device plate is 2.2" x 0.7" and easily fits into Wiremold faceplates for quick installation into poke-thru devices, floor boxes, vista columns, raceways and work surface portals. Because these metal plates are screwed in at installation, communications and A/V connections are secure and will resist being pulled out or broken while connected. AVIP Series Device Plates allow you to bring A/V connectivity to your customers whether they are looking for a computer, audio, video or audio/video connection.

Features & Benefits:

- **Metal, screwed in connections.** Ensure a secure connection that will not be pulled out or broken.
- **Fits into existing Wiremold pathways and faceplates.** Makes installing AVIP devices into any Wiremold pathway quick and easy.
- **Wide range of connector choices.** Meets customer's audio, video, audio/video, computer and data connectivity requirements.
