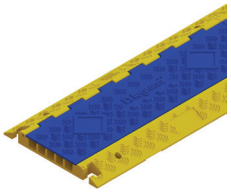
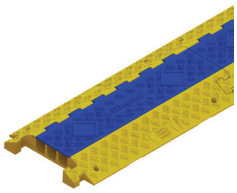
GUARD CABLES ON THE GO

Wiremold® Cable Protectors for Temporary Power



STANDARD



HEAVY DUTY

Job sites and facilities need power everywhere, and extension cords are often a quick fix. Be ready to manage cables during temporary projects with Wiremold Cable Protectors. Designed to integrate with portable power distribution units, these housing units are key to a safe electrical system. Simply mix and match to build yours. Keep things out of the way and organized in a rugged, all-weather design built for heavy duty cables.

Ideal for these applications:

- Food trucks
- Stadiums/racetracks/arenas
- Universities/schools
- Industrial and commercial construction
- Entertainment venues
- Sporting events
- Temporary Healthcare Clinics

Tough, durable and built to last

- Two versions:
  Standard
  - Five channels with a load rating up to 27K lbs

  Heavy Duty
  - Three channels with a load rating up to 50K lbs
- Rugged, all-weather polyurethane construction instead of rubber (which can be damaged by gravel or chemicals)
- Large capacity linear sections
- Available in 3’ sections that lock together

Fast, easy setup and removal

- Convenient stake-down holes provided
- T-style connector interlocks for quick and secure installation
- Easy-to-carry handle molded into the back
- Hinged lid for easy cable loading

Designed for safety

- Non-conductive shock barrier protection
- Rounded dividers protect cables from snags and tears
- Prevents tripping hazard from stray cords
- Tread plate surface for increased traction
- Clearly identifiable molded safety warning symbols
- Designed to provide safe installations that meet NEC, CEC, and OSHA requirements
