CABLOFIL®

UNIVERSAL "HANG ON" DROP OUT

DROP YOUR CABLES WITHOUT DROPPING YOUR SUPPORT

Cable management is a crucial element to keep data centers supported and running, but it is a challenge to run expansive lengths of cable without compromising the support of your wire mesh tray at the cable dropout location.

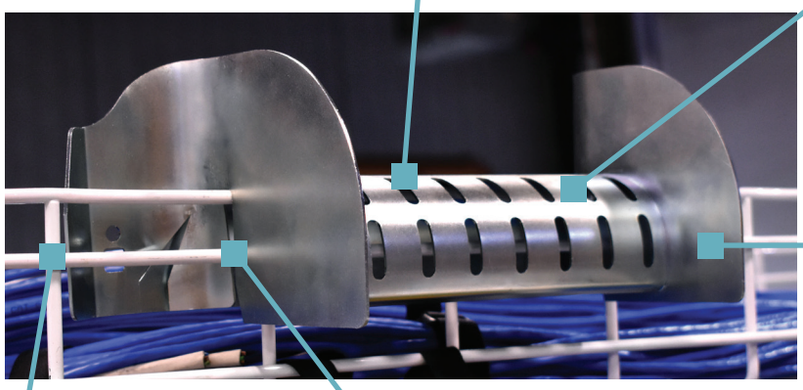
The Cablofil® Universal "Hang On" Drop Out (UDO) offers an ideal support solution for running cables in high-capacity data centers. The UDO makes it easy to perform cable drops directly off the side of the tray without having to make any cuts or modifications, allowing you to maintain the strength of the tray.

Ideal for copper, fiber optic or PoE cabling, the UDO can support and protect large cable bundles with ease.

FEATURES & BENEFITS:

Available in Four Sizes:
Available in 8", 12", 18", and 24" versions

Variety of Finishes:
The UDO comes in electrozinc, white, black or in a custom color to match your data center.



Tie Down Slots:
Optional accessories available assist and secure the cables as they exit the UDO.

Smooth Transition for Cables:
The 120 degree bend ensures cables do not have any potential pinch points or kinks.

2" Tall Side Rails:
Provides a smooth surface for horizontal cable direction changes.

Strong Support:
Does not require any cutting or modifications to the existing tray.

Easy to Install:
Installation slots allow UDO to easily install directly on the edge of the wire mesh tray. Allows for easy moves, adds or changes when needed.
