DA2155-V1

Desktop 802.11n Wireless Access Point

CREATE OR EXTEND A HOME WIRELESS NETWORK

Legrand continues to expand home networking solutions using the latest technologies to ensure fast, reliable network connections throughout any home.

Create a new or expand an existing Wi-Fi network using the Desktop 802.11n Wireless Access Point. Enjoy the freedom of Wi-Fi while utilizing high-speed Internet connections to stream music in the kitchen, video chat with friends and family from the bedroom, or watch a movie without ever leaving the couch. With Wi-Fi, your favorite Internet applications are always just a click away.

Utilize the Range Extender mode to boost the wireless signal to areas previously unreachable by the existing wired or wireless network.

Never worry about privacy while using your home network again. The Wireless Access Point also supports the latest encryption technologies; keeping your network and personal information secure.

Skip the headache and expense of complicated wiring installations. Easily install and configure the router using the simple web-based setup wizard and access the best of the Internet at your fingertips.

FEATURES

- Connects Wi-Fi networked devices at speeds of up to 150Mbps
- Built-in antenna optimization software provides the best network coverage
- Range Extender mode boosts wireless signal to previously unreachable or hard-to-wire-areas flawlessly
- Supports the latest encryption technologies to keep the network secure
- Compatible with other 802.11b/g/n products
- Simple web-based setup wizard enables easy installation and configuration onto the home network
