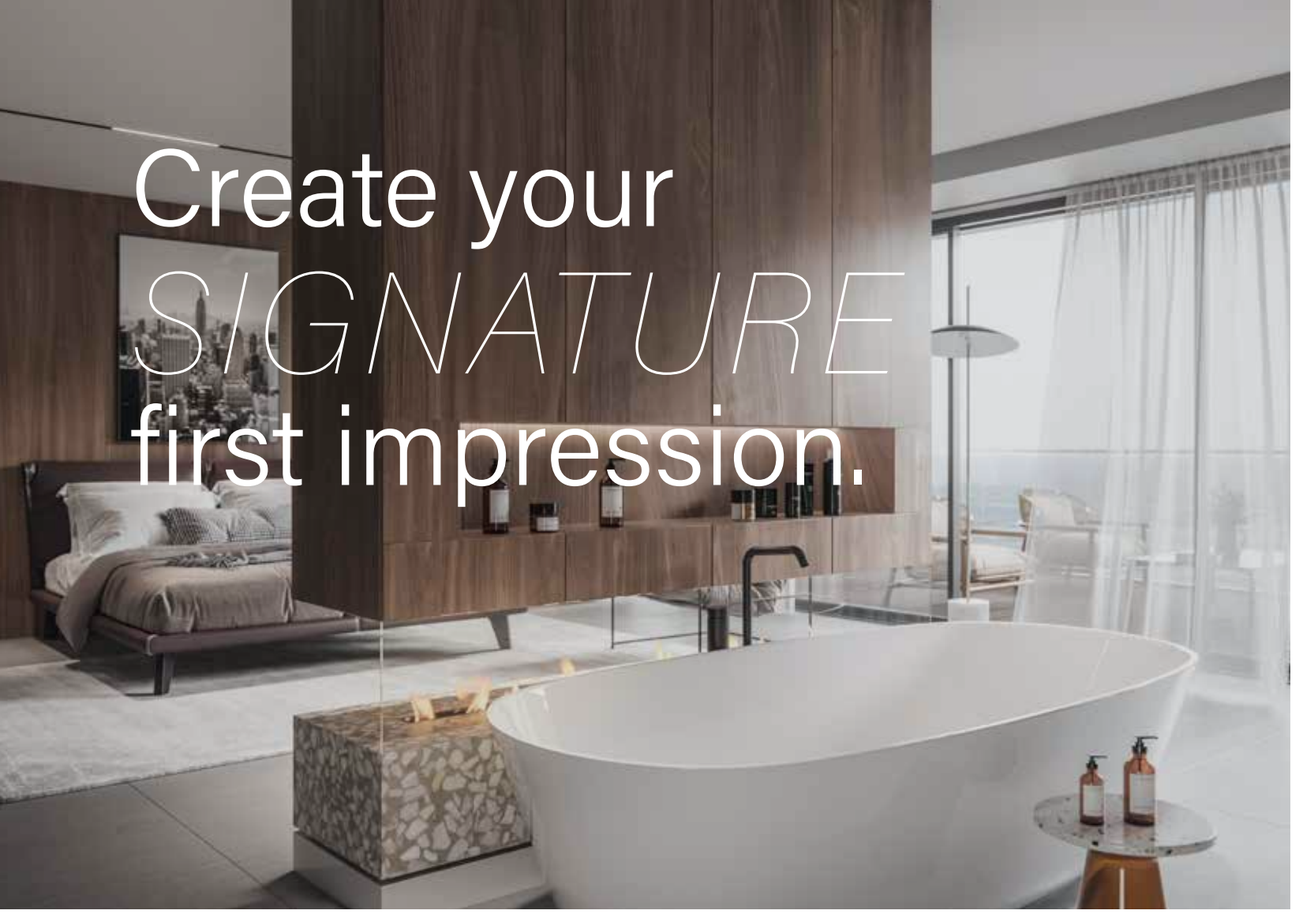
ELEVATE EVERY EXPERIENCE

Smart Hospitality Solutions

legrand®



Create your *SIGNATURE* first impression.

An ideal hotel stay reminds guests of home in all the ways that matter, while still being the perfect getaway they crave. Deliver that experience for every reservation, with Smart Hospitality Solutions from Legrand. An extension of Legrand's trusted hospitality offering, these solutions feature a host of custom settings you select behind-the-scenes to set a welcoming atmosphere of comfort and rest, while also helping you manage your property and enhance safety. And, as part of Legrand's collections of designer switches and outlets, the Smart Hospitality Solutions pair advanced functionality with exceptional style, to further set your brand apart.

SCALABILITY

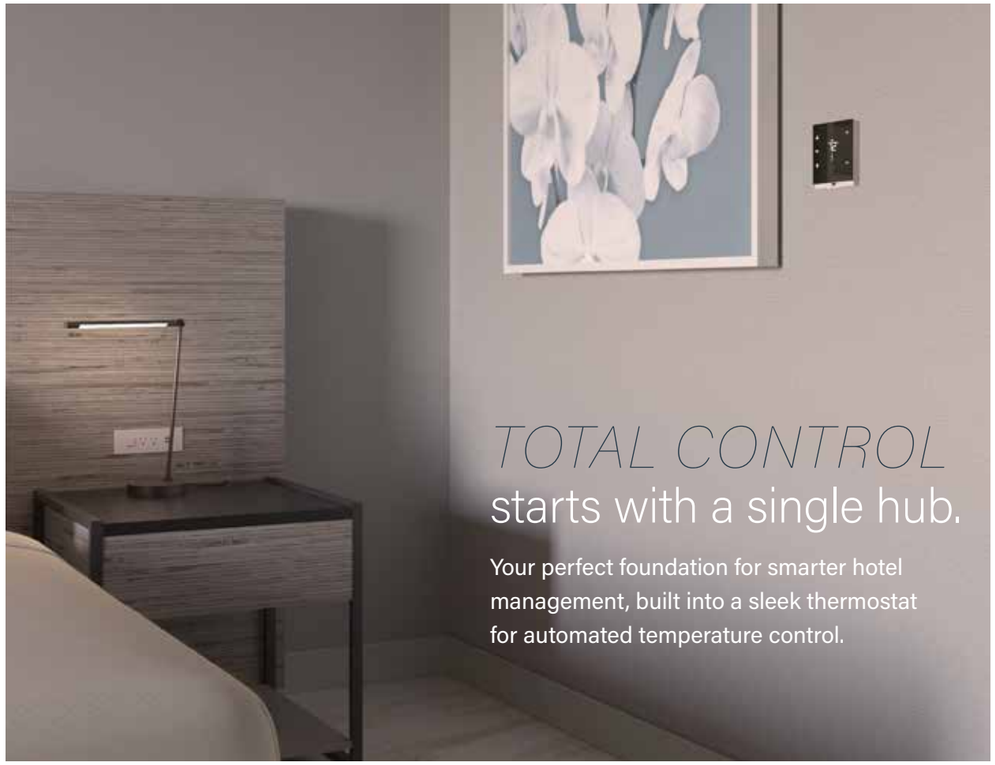
Simply start with just a switch or dimmer that integrates with existing management systems, or build a complete smart solution to fit your property's needs.

SAVINGS

Meet code while reducing expenses through smart lighting and temperature control, letting you easily optimize energy usage in every room.

SAFETY

Keep an eye on your whole property at once, with automated condition monitoring that notifies you the moment something needs your attention.



TOTAL CONTROL starts with a single hub.

Your perfect foundation for smarter hotel management, built into a sleek thermostat for automated temperature control.

Smart Thermostat with Zigbee 3.0

Featuring a built-in Zigbee Hub, the Smart Thermostat is both usable on its own or as the basis for your complete smart solution. Equipped with sophisticated sensors for temperature, air quality, ambient noise and occupancy, it allows you to automate climate control to match a room's status – occupied or unoccupied, rented or unrented – ensuring optimal comfort throughout a guest's stay, and conserving energy between visitors.

Combine with other Smart Hospitality Solutions from Legrand for comprehensive control of lighting, HVAC and more.

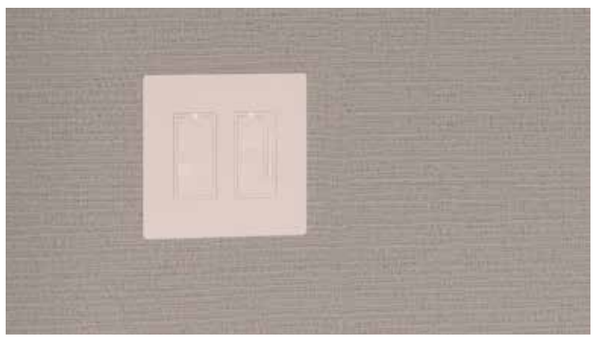
The Smart Thermostat also features a smooth, capacitive touch interface for intuitive control that's a stunning addition to any space.

The *SMARTEST* way to take control of your hotel.

A clever addition to existing properties as well as new projects, these Smart Switches, Dimmers and Sensors are easy to manage and seamlessly integrate through the Zigbee 3.0 protocol to expand your solution as needed.

Smart Switches and Dimmers

Want to elevate the guest experience? Start at the wall. With smart switches and dimmers you can preset or adjust the lighting within your rooms, offering personalized attention to a guest's comfort with the ease of automation. Use in 3-way applications to offer guests convenient, multi-location control within the room. And available in an array of colors and finishes from the adorne® (coming soon) and radiant® Collections, each switch or dimmer also adds a touch of design-inspired style.



- *Smart Switches and Tru-Universal Dimmers install easily, no special wiring required.*
- *Tru-Universal Dimmers are designed to work with virtually any dimmable bulb, flicker-free.*
- *Plug-In versions also available for an easy retrofit.*

Smart Door and Motion Sensors

Understand room status to help you enhance a guest's experience, and manage an entire property more efficiently. The battery-operated Smart Door and Motion Sensors can be used to determine occupancy, and make it easy to automatically adjust lighting and temperature conditions as guests come and go during their stay.

- *Sensors mount easily and discreetly.*
- *Create custom wait times for sensors to ensure guest departure before activating vacant mode.*

Gain valuable insights to help *OPTIMIZE YOUR PROPERTY.*

Legrand's Smart Hospitality Solutions also help you manage your property with ease and efficiency, giving a full view of the facility's occupancy levels and providing key decision-informing data, as well as automatic alerts for enhance safety.

See the bigger picture on energy usage, temperature trends and more, to discover ways to limit waste and reduce costs. Utilize monitoring capabilities for immediate notification in the event of an emergency, helping you quickly locate and address the problem.
