DA1015-V1 / DA1018-V1

Desktop 5-Port Gigabit Ethernet Switch
Desktop 8-Port Gigabit Ethernet Switch

EXTEND HOME NETWORK TO MULTIPLE DEVICES

Legrand continues to expand home networking solutions using the latest technologies to ensure fast, reliable network connections throughout any home.

The Desktop 5-Port or 8-Port Gigabit Ethernet Switches provide a high performance, low cost option to upgrade an older network to Gigabit speeds (1000Mbps). Effortlessly increase the speed of computers, mobile devices and entertainment networked devices with this easy to use solution. Just plug and play, with no installation or programming required.

Stop waiting on slow downloads. Allow power users to move large, bandwidth-intensive files faster - whether it's at the entertainment center, home office, workgroup, or creative production environment. Every user can achieve optimal usage and increase productivity.

FEATURES

- Includes either five or eight Ethernet ports for connecting network devices like computers, Blu-ray players, televisions, and gaming systems
- Provides the fastest connections for reliable IP based HD Audio & Video, online gaming and web browsing
- Passes network signals at up to 1000Mbps (Gigabit speeds)
- Provides speeds 10x faster than Fast Ethernet (10/100Mbps)
- No installation or programming required
