

EQUINOX APP

EQ-APP

Available in 5, 10, and unlimited licenses

Compatible with all generations of InFusion Controllers with combination SD/ Micro SD card

Mobile and tablet system access

Personalize the app based on people, area, time of day, function, and/or language

Description

The Equinox app and accompanying in-wall touchscreens epitomize the ideal user experience by providing a remarkably simple interface for managing luxury environments. With multiple system widgets available and three navigation levels – the live dashboard, full screen view, and edit mode – Equinox can dynamically personalize each iPhone, iPad, and iPod or mobile Android device for any profile.

Download

Download the app from the iTunes Store or the Google Play store, install it on the desired tablet, and let the app read the controller system information and build the widgets. Next, configure the different widgets for each tablet and each profile.

Operation

The Equinox app for mobile devices and tablets follows a simple licensing model. An App licensed on a system through the installation of Equinox 73 or 41 touchscreens and/or purchasing and installing an Equinox app SD license card. Every Equinox 73 and 41 on a project authorizes one mobile or tablet device license without the need of the SD license card. If you need more tablet or mobile apps than you have Equinox 73s or 41s, you can purchase the appropriate quantity SD license card, insert it into the InFusion controller, leave it in the controller, and more tablets are ready to go.

PROJECT		LOCATION/ TYPE
