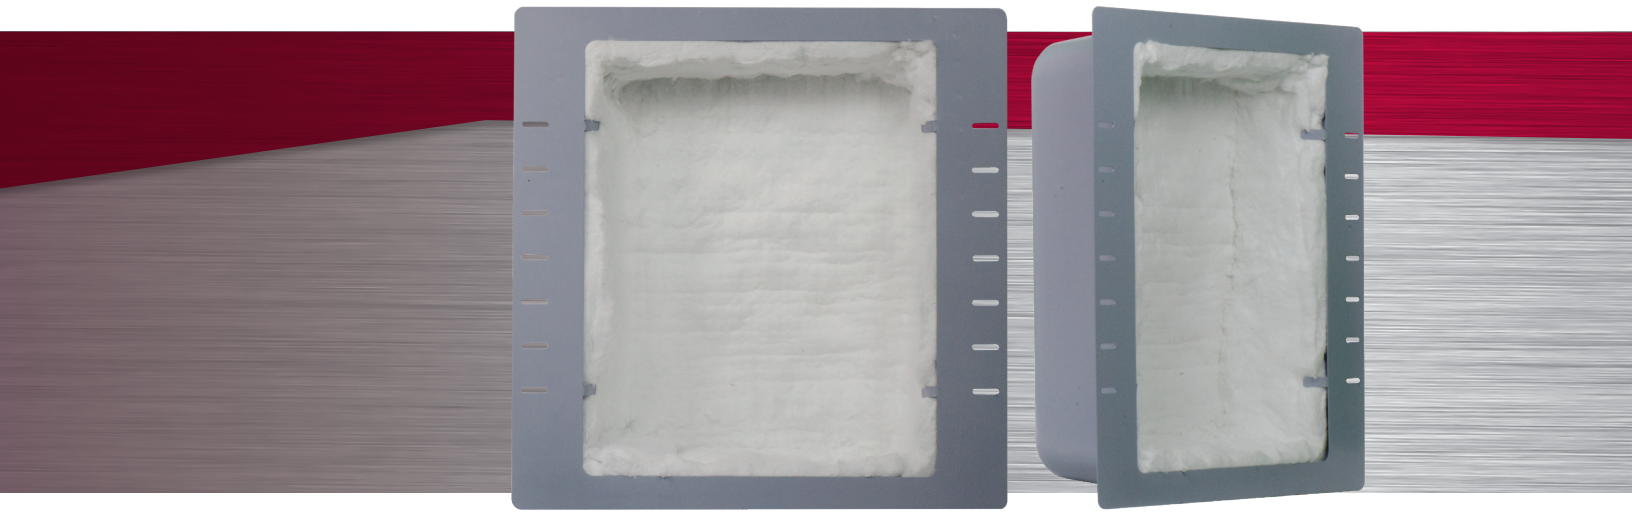
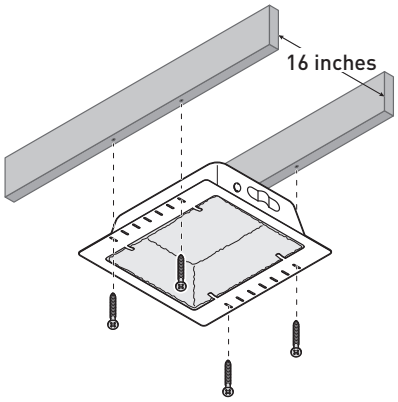
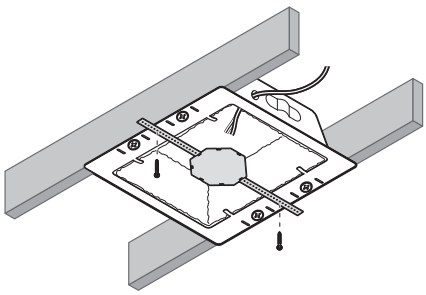
Nuvo®

Fire-Rated Speaker Enclosure

The Nuvo Fire-Rated Speaker Enclosure (NV-BRKIC-BC) meets the ASTM E119 fire rating requirements and ensures consistent speaker performance regardless of construction variations. The universal design works with most in-ceiling speakers while preventing undesirable sound leaks into neighboring rooms. This item is packed as individual units.







- Meets ASTM E119 one-hour fire rating requirements
- Improves sound quality by creating uniform airspace behind each speaker
- Universal design works with most in-ceiling and in-wall speakers
- Reduces sound leakage into other rooms
- Sold individually

Certified To:

- CAN / ULC-S101-M39 Fire Endurance Tests of Building Contruction and Materials (Canada)
- ASTM E119-16a Standard Test Method for Fire Tests of Building Construction and Materials
- ANSI / UL 263 Standard for Fire Tests of Building Construction and Materials
