
KEEPING PATIENTS AND CAREGIVERS HEALTHY AND COMFORTABLE

WATTSTOPPER® PLUS SYSTEM

with Encelium Technology

Wattstopper helps healthcare facilities create comfortable environments that reduce stress and aid recovery. Our carefully controlled lighting — including unrivaled color temperature accuracy and smart dimming — delivers physiological and biological benefits that help patients recover quickly. We're committed to mastering light control for optimal healthcare outcomes.

BEDSIDE CONTROL // The Encelium system integrates seamlessly with any bedside control system, allowing patients to control their lighting.

BE READY FOR EMERGENCIES // Integration with code blue systems turns lights to the desired level immediately — guiding staff members.

EMPOWER DOCTORS // Configurable keypads with colored buttons or engravings allow doctors on rounds to change the lighting of a space quickly — with a single press of a button.

TUNE ALL DAY // Time-scheduled events provide a new level of automation, letting you tune lighting in key areas throughout the day.

CREATE COMFORT // Promote positive outcomes with lighting that feels natural and comforting to all patients and staff.

ENSURE PRIVACY // Integrated control of blackout shades from our partner Somfy® keeps recovery rooms comfortable and private.
