

BUILT FOR MODULAR SPEED

Cable Pathway & Power for Modular Data Centers

Modular data centers move fast. Your pathway and power systems should, too.

From overhead containment to high-capacity power distribution, Legrand's integrated portfolio helps modular builders standardize designs, accelerate fabrication and scale production without sacrificing performance.

THE SOLUTIONS

Wire Mesh Cable Tray

Fast, Flexible Containment

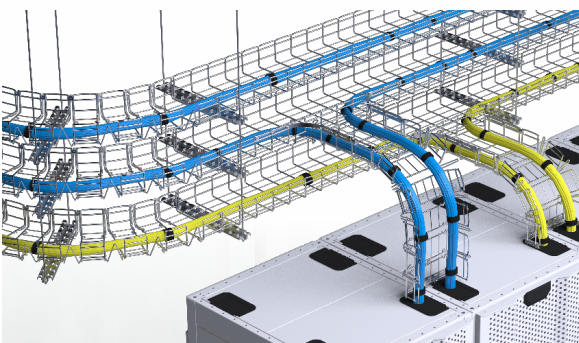

- Lightweight wire mesh for rapid fiber routing and prefab efficiency
- Highest load capacity with minimal space required
- Open design supports airflow and scalable modular layouts

Cablofil® Cable Bus & Power Bus Way

High-Capacity Power, Simplified

- Compact, space-saving alternative to traditional conduit
- Turn-key or in-field modification options for scalable modular deployments
- Streamlined installation for skids, electrical rooms and white space

Cablobend™ Systems

Precision Bends. No Cutting.

- Factory-made bends eliminate onsite cutting and guesswork
- Consistent geometry across every modular build
- Reduces labor variability and accelerates production timelines

Ladder Tray

Heavy-Duty Support for High Cable Volume

- Engineered for larger power and backbone runs
- Strong spans reduce support requirements
- Built for repeatable, high-capacity modular deployments

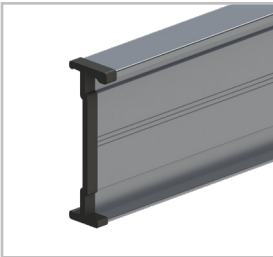

Pin & Sleeve Devices

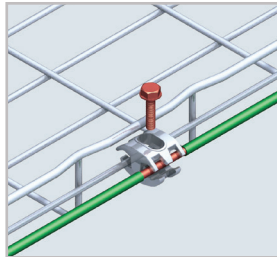

Reliable Power Connections for Modular Deployment

- Designed for repeatable, plug-and-play power distribution
- Secure, locking connections minimize downtime during install and changeout
- Supports standardized modular builds and offsite prefabrication

Accessories That Complete The System

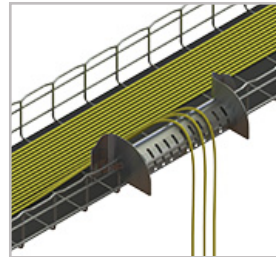

Plastic End Caps

Ground Lugs

Gap Splice Plate

Drop Outs

WHY MODULAR BUILDERS CHOOSE LEGRAND

- **Design Once. Replicate Everywhere.** Standardized systems streamline engineering and repeatable modular builds.
- **Prefab-Ready Solutions.** Pre-engineered components reduce field modifications and support offsite assembly.
- **Faster Install. Fewer Surprises.** Flexible systems adapt to real-world changes without slowing production.
- **One Partner. Complete Pathway & Power.** Cable containment, high-capacity systems, bends, supports and accessories all from one source aligned for modular construction.
