## DataCom Surface Mount Boxes

### COMPANY OVERVIEW

**• Designed to Be Better – Our Commitment to Sustainability**

At Legrand®, our sustainability commitment translates into greater benefits and tangible value for our customers, business partners, employees, and the broader community.

**• Better Performance**

We provide building solutions to meet many building performance goals from sustainability and energy efficiency to productivity and occupant well being. The right choice in network and electrical infrastructure can play a key role in many facets of building performance. Our products help ensure electrical safety. They offer choice and flexibility in space design. They are designed to reduce installation time and material waste on site. Because we know buildings consume a great deal of energy, we offer a range of products and solutions that reduce energy consumption from lighting to plug load to data centers.

**• Better Solutions**

We offer a wide range of innovative solutions for the building, while constantly evolving our design and development processes to improve the environmental profile of our products. Through active monitoring and research, we serve as an expert resource for market trends and building and product performance standards to keep our customers at the top of their game.

**• Better Operations**

We focus on operational excellence because we believe optimizing the way we manage energy, water and waste is not only good for the environment, it's good for business. As part of the Department of Energy's Better Building, Better Plants Challenge (BBBP) Legrand has reduced its energy intensity by over 30% across 14 sites in the United States in just three years. Integrating sustainability into the way we run our operations makes us more competitive – and a better business partner.

For information on Legrand PEP's and other sustainability initiatives, scan the QR code to be brought to our Product Sustainability page.

### LEGRAND'S ENVIRONMENTAL COMMITMENTS

**• Incorporate environmental management into our industrial sites**

Of all Legrand sites worldwide, over 85% are ISO 14001 certified (sites belonging to Legrand for more than five years).

**• Offer our customers environmentally friendly solutions**

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

**• Involve the environment in product design**

Reduce the environmental impact of products over their whole life cycle.

Provide our customers with all relevant information (composition, consumption, end of life, etc.).

### REFERENCE PRODUCT

<b>Function</b>	Provides housing for data connections for up to 6 ports for surface mounting during a 20 year lifetime.
<b>Reference Product</b>	 <p>Part Number: OR-404TJ6 TracJack® Surface Mount Box, 6 Ports</p>

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

# Product Environmental Profile

## DataCom Surface Mount Boxes

### PRODUCTS CONCERNED

The environmental data is representative of surface mount housings for the following product families:

- TracJack®** (OR-404TJ\*)
- Series II®** (OR-404S2\*)
- High Density Jack** (OR-404HDJ\*)
- TechChoice®** (OR-KSSMB\*)
- Miscellaneous** (OR-40300061, OR-40300185, OR-40300186, OR-40300010)

### CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EC and does not contain, as far as we know, any substance on the candidate list from June 2015 for authorization of the REACH regulation (EC) no. 1907/2006 with a concentration above 0.1% w/w.

<b>Total weight of Reference Product (with unit packaging)</b>		<b>162 g</b>			
Plastics as % of weight		Metals as % of weight		Other as % of weight	
ABS	<b>73.3%</b>	Steel	<b>5.1%</b>	Paper	<b>&lt;0.1%</b>
PC/ABS	<b>1.3%</b>	Nickel	<b>&lt;0.1%</b>		
				Packaging as % of weight	
				Paper and Cardboard	<b>15.3%</b>
				PE (low density)	<b>4.6%</b>
				PA 6.6	<b>0.3%</b>
<b>Total plastics</b>	<b>74.6%</b>	<b>Total metals</b>	<b>5.1%</b>	<b>Total other and packaging</b>	<b>20.3%</b>

Estimated recycled material content: 5% of weight.

### MANUFACTURING

The Reference Product comes from a site that has received ISO 14001 certification.

### DISTRIBUTION

Products are distributed from logistics centers located to optimize transport efficiency using EPA SmartWay® certified carriers to reduce greenhouse gases emissions. Information on the distance of distribution is not available so the PCR hypothesis for "Intercontinental transport", 2175 miles (3500 km) by heavy truck, was used. This represents transportation of the Reference Product from our warehouse to the local point of distribution in the North American market.

# Product Environmental Profile

## DataCom Surface Mount Boxes

### INSTALLATION

Only standard tools are needed for installation of the product. No electricity is required for installing the Reference Product.

### USE

#### Servicing and maintenance:

Under normal conditions of use, this type of product requires no servicing or maintenance.

#### Consumable:

No consumables are necessary to use this type of product.

### END OF LIFE

• **Hazardous waste\* contained in the product:** no hazardous waste  
(\* Hazardous waste as defined by European Commission decision 2000/532/EC.

#### • Recycling rate:

Calculated using the method described in the IEC/TR 62635 technical report, the recyclability rate of the Reference Product without packaging is estimated as 95%. This value is based on data collected from a technological channel using industrial procedures. It does not pre-validate the effective use of this channel for end-of-life electrical and electronic products.

Separated into:	(% mass of Reference Product without packaging)
- plastic materials (excluding packaging):	89%
- metal materials (excluding packaging):	6%
- other materials (excluding packaging):	<1%

Recycling rate of packaging (all types of materials): 77%

### ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use, and end of life. It is representative of products marketed and used in North America.

The following modelling elements were taken into account:

<b>Manufacturing</b>	Packaging taken into account up to third level packaging. As required by the PEP ecopassport program, all transport for the manufacturing of the Reference Product, including materials and components, has been taken into account. The waste generated during manufacturing phase has been taken into account.
<b>Distribution</b>	Transport between the last distribution center and an average delivery to the sales area. The default scenario modelled maximizes the environmental impact.
<b>Installation</b>	The end of life of the packaging (32.8 g) is taken into account at this phase. Transport of packaging to end of life treatment.
<b>Use</b>	<ul style="list-style-type: none"> <li>• Under normal conditions of use, this type of product requires no servicing or maintenance.</li> <li>• No consumables are necessary to use this type of product.</li> <li>• Product category: enclosure</li> <li>• Use scenario: no energy consumption during the 20 year working life. This modelling duration does not constitute a minimum durability requirement.</li> <li>• Energy model: Electricity(US) - 2009</li> </ul>
<b>End of life</b>	The default end of life scenario modelled maximizes the environmental impact.
<b>Software used</b>	EIME V5 and its database "CODDE-2015-04" and the indicators defined in the PCR ed 3 in alignment with the EN15804 standard

The values of the 27 impacts defined in the PCR-ed3-EN-2015 04 02 are available in the digital database of pep-ecopassport.org website. The environmental impacts of the Reference Product are representative of the products covered by the PEP, which therefore constitute a homogeneous environmental family.

The environmental impact of the Reference Product occurs predominantly during the manufacturing phase.

# Product Environmental Profile

## DataCom Surface Mount Boxes

### ENVIRONMENTAL IMPACTS (continued)

For products other than the Reference Product, the environmental impacts for Manufacturing and Distribution are proportional to the mass of the Reference Product. Impacts for Installation are the same as the Reference Product. Impacts for End of Life are proportional to the mass of the Reference Product (without packaging).
