

Product Environmental Profile

Omni Box Series Floor Boxes Non metallic Cover Plates

COMPANY OVERVIEW

• Sustainability built in to support our associates, customers, and the environment

At Legrand North and Central America, we're committed to leading by example within our own operations, to developing high quality solutions for our customers' High Performance Buildings, and to transforming how people live and work – more safely, more comfortably, more efficiently.

• Better Performance

A core principle of designing for sustainability drives us to innovate products and systems that enable buildings to reach exceptional levels of performance, bringing about industry-leading ideas, inventions and initiatives.

• Better Operations

A commitment to a leadership role in operational excellence through environmental management, optimizing the way we manage energy, water and waste.

• Better Lives

A dedication to enhancing employee and community welfare through programs that help people enjoy healthier, more productive and more rewarding lives.

For more information on Legrand's PEPs and other sustainability initiatives, visit legrand.us/sustainability.

LEGRAND'S ENVIRONMENTAL COMMITMENTS

• Incorporate environmental management into our industrial sites

Of all Legrand sites worldwide, over 85% are ISO 14001 certified (sites belonging to Legrand for more than five years).

• Offer our customers environmentally friendly solutions

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

• Involve the environment in product design

Reduce the environmental impact of products over their whole life cycle.

Provide our customers with all relevant information (composition, consumption, end of life, etc.).

REFERENCE PRODUCT

Function	Provide access and protection for power and communication cables for 20 years.
Reference Product	 <p>Part Number : 837PCC-BLK Nonmetallic 3-gang carpet flange</p>

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

PRODUCTS CONCERNED

The environmental data is representative of the following products:

817PCC-BLK / 817PCC-BRN
827PCC-BLK / 827PCC-BRN
837PCC-BLK / 837PCC-BRN

829PFLRT-BLK / 829PFLRT-BRN
829PSTC-BLK / 829PSTC-BRN
829PCK-BLK / 829PCK-BRN
829PFL-BLK / 829PFL-BRN

828PR-BLK / 828PR-BRN
828PRGFI-BLK / 828PRGFI-BRN

Product Environmental Profile

Omni Box Series Floor Boxes Non metallic Cover Plates

CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market.

It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EC and does not contain, as far as we know, any substance on the candidate list at the time the PEP was published for authorization of the REACH regulation (EC) no. 1907/2006 with a concentration above 0.1% w/w.

Total weight of Reference Product with unit packaging		469 g				837PCC	
Plastics as % of weight		Metals as % of weight		Others as % of weight			
Product							
PC	39.5%	Steel	32.3%				
PE	3.0%	Copper Alloys	1.3%				
Packaging							
				Wood			19.4%
				Carton			4.5%
Total plastics	42.5%	Total metals	33.6%	Total others			23.9%

Estimated recycled material content: 17% of weight.
For the **817PCC** and **827PCC** products, take the same values.

Total weight of Reference Product with unit packaging		190 g				829PFL	
Plastics as % of weight		Metals as % of weight		Others as % of weight			
Product							
PC	18.4%	Steel	5.8%				
PE	5.0%						
PVC	1.9%						
Rubber	9.1%						
Packaging							
				Wood			46.6%
				Carton			13.2%
Total plastics	34.4%	Total metals	5.8%	Total others			59.8%

Estimated recycled material content: 7% of weight.
For the **829PFLRT**, **829PSTC** and **829PCK** products, take the same values.

Total weight of Reference Product with unit packaging		235 g				828PRGFI	
Plastics as % of weight		Metals as % of weight		Others as % of weight			
Product							
PC	26.7%	Steel	9.8%				
PE	5.2%						
Rubber	5.2%						
Packaging							
				Wood			41.7%
				Carton			11.4%
Total plastics	37.1%	Total metals	9.8%	Total others			53.1%

Estimated recycled material content: 8% of weight.
For the **828PR** products, take the same values.

Product Environmental Profile

Omni Box Series Floor Boxes Non metallic Cover Plates

MANUFACTURING

The Reference Product comes from sites that have received ISO 14001 certification.

DISTRIBUTION

Products are distributed from logistics centers located to optimize transport efficiency using EPA SmartWay® certified carriers to reduce greenhouse gases emissions. Information on the distance of distribution is not available so the PCR hypothesis for "Intracontinental transport", 2175 miles (3500 km) by heavy truck, was used. This represents transportation of the Reference Product

INSTALLATION

No electricity is required for installing the Reference Product.

USE

Servicing and maintenance:

Under normal conditions of use, this type of product requires no servicing or maintenance.

Consumable:

No consumables are necessary to use this type of product.

END OF LIFE

• **Hazardous waste* contained in the product:** no hazardous waste
(* Hazardous waste as defined by European Commission decision 2000/532/EC.

• Recycling rate:

Calculated using the method described in the IEC/TR 62635 technical report, the recyclability rate of the Reference Product without packaging is estimated as 97%. This value is based on data collected from a technological channel using industrial procedures. It does not pre-validate the effective use of this channel for end-of-life electrical and electronic products.

Separated into:	(% mass of Reference Product excluding packaging)
- plastic materials:	53%
- metal materials:	44%
- other materials:	none

Recycling rate of packaging (all types of materials): 96%

ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use, and end of life. It is representative of products marketed and used in North America.

The following modelling elements were taken into account:

Manufacturing	Packaging taken into account. As required by the PEP ecopassport program, all transport for the manufacturing of the Reference Product, including materials and components, has been taken into account. The waste generated during manufacturing phase has been taken into account.
Distribution	Transport between the last distribution center and an average delivery to the sales area. The default scenario modelled maximizes the environmental impact using the PCR hypothesis for "Intracontinental transport": 2175 miles (3500 km) by heavy truck.
Installation	The end of life of the packaging is taken into account at this phase. Transport of packaging to end of life treatment.
Use	<ul style="list-style-type: none"> • Under normal conditions of use, this type of product requires no servicing or maintenance. • No consumables are necessary to use this type of product. • Use scenario: No energy consumption during the 20 year working life. This modelling duration does not constitute a minimum durability requirement. • Energy model: Electricity(US) - 2009
End of life	The default end of life scenario modelled maximizes the environmental impact using the PCR hypothesis for "Local transport": 621 miles (1000 km) by heavy truck and landfilling.
Software used	EIME V5 and its database "CODDE-2016-11" and the indicators defined in the PCR ed 3 in alignment with the EN15804 standard

Product Environmental Profile

The values of the 27 impacts defined in the PCR-ed3-EN-2015 04 02 are available in the digital database of pep-ecopassport.org website. The environmental impacts of the Reference Product are representative of the products covered by the PEP, which therefore constitute a homogeneous environmental family.

The environmental impact of the Reference Product occurs predominantly during the Manufacturing phase.

Product Environmental Profile

Omni Box Series Floor Boxes Non metallic Cover Plates

ENVIRONMENTAL IMPACTS (continued)

For products other than the Reference Product, the environmental impacts can be calculated by taking the values of the reference product and applying these ratios :

Part Number	Manufacturing	Distribution	Installation	Use	End of Life
837PCC products	1	1	1	NO	1
829PCK products	1.6	0.5	1.1	NO	0.5
829PFL products	1.1	0.5	1.2	NO	0.4
829PFLRT products	1.1	0.5	1.3	NO	0.4
829PSTC products	1.3	0.4	0.9	NO	0.3
827PCC products	1	0.9	1	NO	0.9
817PCC products	0.8	0.6	1	NO	0.6
828PR products	1.7	0.5	1.2	NO	0.5
828PRGFI products	1.7	0.5	1.2	NO	0.5

Registration number: LGRP-00789-V01.01-EN	Drafting rules: "PCR-ed3-EN-2015 04"
Verifier's accreditation number: VH02	Information and reference documents: www.pep-ecopassport.org
Date of issue: 11-2018	Validity period: 5 years
